Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group II, claim 64 in the reply filed on April 13, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 64 is rejected under 35 U.S.C. 102(b) as being anticipated by Tashiro et al. (US 5,589,182).

Claim 64 of the instant application is drawn to a composition comprising a flavone/isoflavone of group (a), one of resveratrol, ascorbic acid (vitamin C), ascorbate salts, and dehydroascorbic acid, and a physiologically acceptable carrier.

Tashiro et al. disclose a composition comprising daidzein, which meets the structural limitations of a compound of group (a), and vitamin C, and a carrier (see claim 1, group I and m). It is noted that the instant claims use open claim language, so any of the additional agents in the

Art Unit: 1623

Tashiro et al. patent are not delimited from being included therein. Moreover, it is noted that the instant claims requirement of having a physiologically acceptable carrier is seen to be met by any of the additional agents, such as glucose for example, as glucose is known to be physiological acceptable and thus could be a physiologically acceptable carrier. Moreover, claim 30 even provides the composition is in the form of a health drink, and as such, must be in a physiologically acceptable carrier. It is also noted that liquiritigenin (group p of claim 1) and flavon (group q of claim 1) are also seen to meet the limitations of the flavone/isoflavone of group (a).
